WHEREAS, solar energy is benefitting both rural and urban Iowa with more than \$250 million in private investment throughout all of the state's 99 counties; and

WHEREAS, clean energy is part of America's energy future. It includes generation from renewable sources such as wind, solar, hydro and geothermal sources, but it also includes nuclear, natural gas, and carbon capture technologies as well as energy storage; and

WHEREAS, as our country celebrates National Clean Energy Week, I encourage individuals and organizations in Iowa to support common sense solutions to address America's economic and energy needs in the 21st century. I also encourage municipalities and individuals to implement the cleanest, lowest-emitting energy technologies available; and
